The Deputy Director of Central Intelligence

Washington, D.C. 20505

18 Feb

Admiral Inman, *[Signature]*

I had a call from Mary Ann Donello (225-2121).

Said you had told Congressman Gore you would like to testify on following and suggested 19 March (you will be away and I gave her some other possible dates -- she said she would call back later).

Joint Hearings-Science Research and Technology Subcommittee with the Investigations and Oversight Subcommittee re Scientific Information Transfer and Government Restrictions as they pertain.

Would be in the Rayburn bldg (Rm 2325?) and she thought it would take a few hours.

I mentioned the above to Doug and he pulled attached in material waiting for your return.

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM:

STAT

Chairman, Technology Transfer Intelligence Committee

SUBJECT:

Congressman Gore's Concern and Interest Regarding  
the Technology Transfer Problem Described in Recent  
Talk by the DDCI

1. At the conclusion of a briefing on the technology transfer problem given to Representative Albert Gore on the 10th of February, he asked what the intelligence basis was for the talk given recently by you at the AAAS meeting. He was referring to a newspaper article on the subject. I commented that the press items I had read were not complete and tended to misrepresent what was actually delivered. I recommended he read the briefing for himself and asked [ ] to provide him a copy. (U)

STAT

2. In response to his request for examples of the type of transfers covered by your talk, I cited two and suggested that he be briefed by the Committee on Exchanges (COMEX) which follows this area closely for the Intelligence Community. He agreed and that briefing has now been scheduled for 18 February by the Legislative Liaison Branch. (U)

3. Congressman Gore expanded a bit on his concern stating that he chairs a Science and Technology Subcommittee, and he has received considerable pressure from the academic community on the general topic of the technology transfer problem covered by you in your AAAS talk. He would like to air the issue publicly and try to bring some understanding on both sides of the problem--national security awareness and academic freedom. To this end, he would like to have our help in getting the intelligence threat and national security problems properly presented. I believe he is sincere in his offer and that you should further discuss this matter with him at your earliest convenience. (U)
